

Genpact Named a Leader in Content Moderation Services by Everest Group

Ranking emphasizes Genpact's robust digital tools and policy experts to deliver insights for businesses and drive user safety

NEW YORK, July 6, 2021 [/PRNewswire/](#) -- Everest Group, a leading research and consulting firm, has named [Genpact](#) (NYSE: G), a global professional services firm focused on delivering digital transformation, as a leader in the Everest Group PEAK Matrix® for Trust and Safety – Content Moderation Service Providers 2021 report.

"User-generated content across online platforms is constantly evolving, and, as a result, the challenges enterprises face are also highly dynamic and require them to proactively monitor trends across the globe," said Manu Aggarwal, Vice President, Everest Group. "Genpact has built strong systems to monitor large volumes of content with the viral potential to identify gaps in policies, thereby ensuring end-user safety and reputation for its clients."

The report evaluated 18 companies in such areas as vision and strategy, scope of services offered, and innovation and investments. Everest Group cited Genpact's wide array of services across the trust and safety value chain, noting the company's investment in robust artificial intelligence and machine learning tools to boost productivity and manage talent, as well as its Policy Center of Excellence, whose experts track new trends and work with clients to implement policy changes. The report also highlighted Genpact's continued investment in its Global Command Center – a proprietary analytics tool to proactively detect trends in online abuse and deliver robust insights to the platform's clients.

The Global Command Center uses data visualization, machine learning, and natural language generation to help drive modernized operations to deliver user safety at scale online. For example, for a social media client, Genpact preempted a surge in user-generated content coming out of more than 100 large unplanned events. Leveraging Genpact's speedy derived insights, the client was able to implement over 10 major policy improvements, enabling a reduction in harmful content, and curbed public and reputational risks.

"Every industry is transforming with digital, and all businesses with a digital presence or online community need to focus on user safety," said Patrick Cogny, global business leader, Hi-Tech, Manufacturing and Services, Genpact. "Genpact has spent the past few years developing a deep understanding of changing user behavior and new abuse trends on platforms. This recognition underscores our proven operating models and industry expertise to counter inappropriate content, build trust and safety, and enhance user experience."
