Sudarshan Chemical Strengthens Global Operating Model with New Global Capability Center in Partnership with Genpact

Pune, India | February 10, 2026 — **Sudarshan Chemical Industries Limited** (SCIL), a leading global pigment and color solutions provider, today announced the establishment of a Global Capability Center (GCC) as a core element of its evolving global operating model. Developed in partnership with **Genpact (NYSE: G)**, an agentic and advanced technology solutions company, the GCC consolidates critical enterprise capabilities to strengthen governance, enable more consistent execution, and support Sudarshan's global operations and customer commitments.

Located in **Pune**, alongside Sudarshan's global headquarters, the Global Capability Center consolidates previously distributed enterprise functions into a single, integrated hub. The center is designed to strengthen coordination across geographies, improve governance and decision flow, and support Sudarshan's global operations and customer commitments as the business continues to scale.

Commenting on the inauguration, **Mr. Rajesh Rathi, Global Chairman and Managing Director, Sudarshan Chemical**, said:

"As we scale globally, operational excellence becomes a critical differentiator. Our GCC in Pune is a strategic investment in strengthening process efficiency and execution discipline across the organization. In partnership with Genpact, this center will help us deliver faster, smarter, and more consistently for our customers, while reinforcing a culture of continuous improvement and customer excellence."

The GCC supports Sudarshan's global operations beyond India, enabling tighter coordination across functions and geographies while laying the foundation for future automation and continuous improvement. It is designed to evolve alongside the business, with a focus on embedding standardized processes, stronger controls, and scalable digital capabilities.

Diwakar Singhal, Global Business Leader for Manufacturing, Genpact, said:

"The launch of Sudarshan's Global Capability Center marks an important step in our shared journey and reflects our long-term partnership. Through the GCC, Genpact is working alongside Sudarshan to consolidate, operate, and continuously improve critical enterprise processes. By combining Genpact's deep chemical manufacturing expertise, process intelligence, and domain-led AI and agentic capabilities, we are helping Sudarshan strengthen governance, improve execution, and build an operating model that can adapt and scale as the business evolves globally."

This milestone builds on Sudarshan's recent global expansion, including the acquisition of **Heubach Group** in 2025, which significantly expanded the company's international footprint and customer reach. Together, these initiatives reinforce Sudarshan's ambition to operate as a truly global pigment leader, supported by a future-ready operating model.

About Sudarshan:
Sudarshan Chemical Industries Ltd (BSE: 506655 | NSE: SUDARSCHEM) is a global leader in color solutions and specialized pigments, serving customers in over 120 countries.
